Tutorial
$n = 20$
The divisors of 20 are $1, 2, 4, 5, 10, 20$ and their sum is 42.
Input Format
A single line with an integer, n.
Constraints
$1 \leq n \leq 1000$
Output Format
You are not responsible for printing anything to stdout. The locked template code in the editor below will call your code and print the necessary output.
Sample Input
6
Sample Output
I implemented: AdvancedArithmetic
12
Explanation
The integer 6 is evenly divisible by 1, 2, 3, and 6. Our divisorSum method should return the sum of these numbers, which is $1 + 2 + 3 + 6 = 12$. The Solution class then prints
I implemented: AdvancedArithmetic on the first line, followed by the sum returned by divisorSum (which is 12) on the second line.
